

Strategy

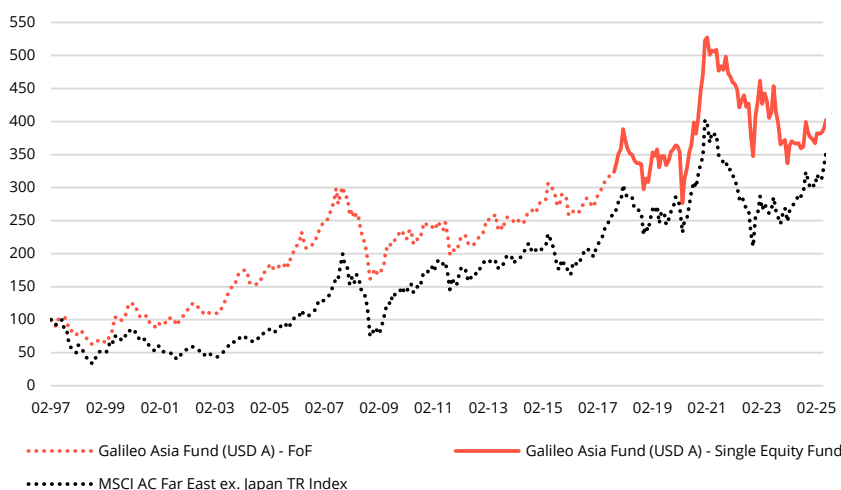

The Galileo Asia Fund is an actively managed equity fund investing in structural growth themes across Asia and is benchmark agnostic. The benchmark is used exclusively to calculate the outperformance fee. The specific themes depend on the stage of the country's economic development. Industrialization & urbanization create opportunities in countries with a low GDP per capita. Upper middle - income countries feature above average growth in the consumer service sector & luxury consumption as the discretionary spending power increases. Countries with a high GDP per capita grow above average in technology & innovation. The fund follows a growth-at-a-reasonable-price (GARP) approach. Main investment criteria are a sustainable business model, shareholder composition, cash flow generation and the health of the balance sheet. Since end of September 2017, the fund invests exclusively in single equities. The fund originally started as a fund of funds.

For investors in Switzerland: The Fund management Company is IPConcept (Schweiz) AG, Bellerivestrasse 36, P.O. Box, CH-8008 Zurich, the paying agent is DZ PRIVATBANK (Schweiz) AG, Bellerivestrasse 36, P.O. Box, CH-8008 Zurich and the custodian is DZ PRIVATBANK (Schweiz) AG, Bellerivestrasse 36, P.O. Box, CH-8008 Zurich. The Prospectus, the Key Investor Information Document and the Annual and Semi-Annual Reports may be obtained free of charge from the Fund management Company and the custodian. Past performance, simulations or forecasts are no reliable indicator of future performance. The gross performance according to the BVI method does not take into account the costs charged on the issue and redemption of units (issue and redemption premium) and fees incurred during the holding period (e.g. transaction costs). If an investor wishes to purchase units for € 1,000, he must pay € 1,030 with an issue premium of 3 %. The investor may incur securities account costs and other costs (e.g. custody or safekeeping costs), which reduce the performance. It should be noted that the value of the acquired units may fluctuate due to fluctuations in the investments in the fund and the listing of the securities. The fund exhibits increased volatility due to the composition of its portfolio or the portfolio management techniques used, i.e. the unit price may be subject to considerable upward and downward fluctuations even within short periods of time. Furthermore, in the case of foreign currencies, the return may rise or fall as a result of currency fluctuations.
